## The Codes of Ethics and More

The codes of ethics of the major mental health professional organizations specify the basic standards for ethical practice. Their general guidance is essential. However, the codes cannot address every ethical issue you will encounter.

This workshop will review the basics. Interactive experiences with other participants will expand your knowledge and decision making ability (and make it all more interesting!).

### Just a hint of what you can expect to learn

~ The fundamentals of the Code of Ethics

*Develop a credible model of making ethical decisions:*

- Using a multidimensional approach
- Looking at ethics in a deeper way

- Aspirational ethics - the ideal standards
- Consequential ethics - legal ramifications of bad decisions
- Organization/workplace ethics - ethical relationship to your organization

- A overview of the interrelation between the confidentiality of HIPAA and 42 CFR Part 2.
